

## What is Canal PREVENTION?

Canal PREVENTION is a tool which is put at the disposal of stakeholders involved in fighting HIV-AIDS and who want to use videos as support for carrying-out prevention activities against Sexually Transmittable Infections and HIV-AIDS.

Canal PREVENTION was created by the association SIDA-ENTREPRISES and is hosted by CFAO, one of the SIDA-ENTREPRISES' member enterprises.

## What films are available on Canal PREVENTION?

The films are about different themes:

What is HIV?

What is AIDS?

How is the virus transmitted?

What is the mother to child transmission?

How to protect oneself?

How to live with the virus?

How to talk about it to close family or friend?

What are ARVs? ...

Each film delivers a message but also, of course, a tool for discussion!

## How does Canal PREVENTION operate?

- View: you may view the films directly by streaming.
- Download: you may download freely the films you are interested in using your pc, a USB key or even to an external disc drive and organise a viewing whenever you like to increase a group of people awareness on HIV.
- Share with others: you may recommend and send this film to a friend.

## You have produced a film on STIs and HIV-AIDS and you want to broadcast it to a wide audience ...

We invite the people or entities having produced films on the HIV-AIDS theme to contact us at the following address: [contact@sidaentreprises.org](mailto:contact@sidaentreprises.org) in order to discuss the opportunity of placing your film(s) online.

(See "Canal PREVENTION charter")
